Skills & Expertise

- **Engineering:** TypeScript, NextJS (App Router/Server Actions), React Server Component, GraphQL, Zustand.
- **Design Systems:** Tailwind CSS, Framer Motion, Radix UI, Shadcn/ui, Storybook, Figma (Components, Variables), Design Tokens Strategy, Accessibility (WCAG).
- **Architecture & Product:** Headless CMS (Shopify, Contentful), Core Web Vitals, CI/CD, Serverless Functions, Technical Documentation, Product Strategy, Async Collaboration, AI-Assisted Dev with architectural rigor.

Experience

Frontend & Design Engineer Consultant | Nectar | Remote, Jan 2025 - Present

- **Architecture & Delivery:** Architected and shipped highly scalable, headless platforms using Next.js App Router, TypeScript, and Shopify/Contentful, focusing on strict Core Web Vitals and performance.
- **Design System:** Engineered an open-source, accessible React component library. Built automated pipelines to sync Figma variables directly to production code, completely eliminating design-to-dev friction.
- **Product Lifecycle Ownership:** Managed the complete product lifecycle from initial UX research to CI/CD deployment. Acted as the core technical stakeholder for B2B and B2C clients.

Planned Sabbatical & Technical R&D | Apr 2023 - Dec 2024

Following a successful 3-year tenure scaling Grandado's architecture, took a deliberate sabbatical to travel solo across Asia and the Americas. Dedicated this period to intensive technical R&D, mastering emerging paradigms.

Lead Frontend & Design Engineer | Grandado | Remote, Apr 2020 - Mar 2023

- **Frontend Architecture:** Led the frontend team & architecture for a massive e-commerce ecosystem (4 brands, 17 countries, 4M+ products) handling high-traffic loads using TS, React, React Native, and GraphQL.
- **Performance & Scalability:** Refactored legacy codebases and optimized rendering cycles, ensuring stable Core Web Vitals and a highly performant architecture across all international domains.
- **Engineering Leadership:** Directed the technical implementation of the UI, bridging the gap between design and development teams, translating UI requirements into viable React component architectures.

Full Stack Engineer | OGD | Amsterdam, 2018 - 2020 | Enterprise (IKEA) & B2B React Systems

Full Stack Engineer | Stack Shuttle & IBT | Dublin & Seville, 2016 - 2018 | Rapid MVPs. React, Elixir

Education

Bachelor's Degree in Industrial Technologies Engineering | University of Seville | 2008 - 2016
